

### RWIMBOGO ECD MODEL

The Model ECD since its inauguration is delivering holistic services and has reached the following outcome:

- Children nutrition was improved at ECD and at home through growth monitoring and cooking demonstration conducted at the model center with parents whom children are enrolled in model ECD. **The Government emphasized ECD nutrition program by contributing to school (Model ECD) feeding for children attending and by paying ECD teachers.** Parents contribution helps in other necessary Children needs such as hygiene keeping, ECD support staff,...
- Parenting services delivered at ECD increased with involvement of fathers in child education where **30 fathers who graduated from parenting classes participate regularly in service delivery.**
- 129 Children shifted from Model ECD to nearest Primary schools are best performers due to strong base they acquired at ECD, and support from parents who were trained to assist them at home : **The 7 best performers in each class passed through ECD, the 10 least performers in each class no one is the Model ECD.**
- Community was clearly developed with the impact of the ECD project that was followed with construction of Primary school to host children transitioning from Rwimbogo model ECD. Former remote area where child could join the school at age of 7years is now academic environment that was enabled the village to be **model village in the sector.**
- The school is a learning center for teachers and management committees from surrounding 20 community ECD centers, **these community center have improved their teaching standards through their gained skills in producing learning and play materials.**
- The presence of the school enabled more than 7 households to have monthly paying job and enable them to support their families, others are supplying some food stuffs at school and earn money.
